Professional Summary

I'm a game and immersive media developer at the University of Miami with a strong interest in interactive storytelling, virtual reality, and experimental digital experiences. My work is driven by design and systems-based thinking, with a focus on user experience and player agency. I develop projects across computer games and XR experiences, experimenting with interaction, space, and storytelling using modern game engines and web-based tools. I thrive in collaborative, iterative environments that blend gameplay mechanics with atmospheric sound and visuals through playtesting and feedback.

Professional Experience

LongHorn Steakhouse – Server / To-Go Server / Host

Miami, FL | September 2023 – Present

- Delivered exceptional guest service in both dine-in and to-go operations, ensuring a welcoming and efficient experience.
- Accurately took and entered guest orders, delivered food and beverages promptly, and verified quality and presentation.
- Assisted with to-go and curbside orders by packaging items, checking accuracy, and delivering with professionalism.
- Greeted guests upon arrival, managed seating charts and waitlists, and coordinated smooth table transitions.
- Processed payments quickly and accurately, following all POS and cash-handling procedures.
- Collaborated with team members across all positions to maintain smooth restaurant operations.
- Ensured cleanliness, organization, and compliance with food safety and brand standards.

Publix Supermarkets, Inc. – Customer Service Associate

Miami, FL | June 2021 – September 2023

- Delivered premier customer service by greeting shoppers and addressing questions.
- Ensured products were within expiration date and rotated stock according to

planograms.

- Assisted with unloading trucks, stocking shelves, and organizing stockrooms.
- Supported store operations by filling assigned sections and maintaining shelf sets.
- Assigned and managed lunch schedules for staff members.

Miller Road Animal Clinic – Volunteer

Miami, FL | October 2018 – 2019

- Prepared fecal samples for testing and assisted in administering vaccines.
- Supported veterinarians by preparing medications and rabies shots for canine and feline patients.
- Assisted in examination rooms with animals and doctors.
